

PhysioGuide AI — Clinical Therapy Report

Patient Name: Validation User	Report Date: 2026-06-07 17:22:35
Exercise Mode: Squats	Status: Completed
Average Accuracy: 94%	Reps Completed: 12 reps

Performance Assessment & Insights

The patient successfully completed a 0m 48s session performing Squats. A total count of 12 repetitions was logged with an average alignment accuracy score of 94%. Real-time posture joint overlays recorded high stability with minimal compensatory movements. Range of motion was excellent and within target clinician parameters. Recommended to progress to higher resistance or duration.
